

## Collaboration & Engagement

This section addresses how councils can collaborate with others to improve their own climate action and to support others in the area to decarbonise. More than half of the emissions cuts needed to reach net zero rely on people and businesses taking up low-carbon solutions, and councils can work with those in their local area to enable those solutions.

### 2025 average score and 2023 comparison<sup>1</sup>

by council type		
54%	Single Tier	▲ 1
56%	District	▲ 3
63%	County	▲ 3
27%	Northern Ireland	▲ 4
55%	Combined Authority	0

While average scores have increased since 2023 across most council types and for most questions, UK local authorities have lobbied the UK Government less than they did in 2023. We also observed that during the assessment period there had been no new partnerships between local authorities and health services.

### LEADING THE WAY

**87%** ▲ 8 versus 2023

of councils<sup>2</sup> have a Climate Action Plan with SMART targets<sup>3</sup>

**64%** ▲ 8 versus 2023

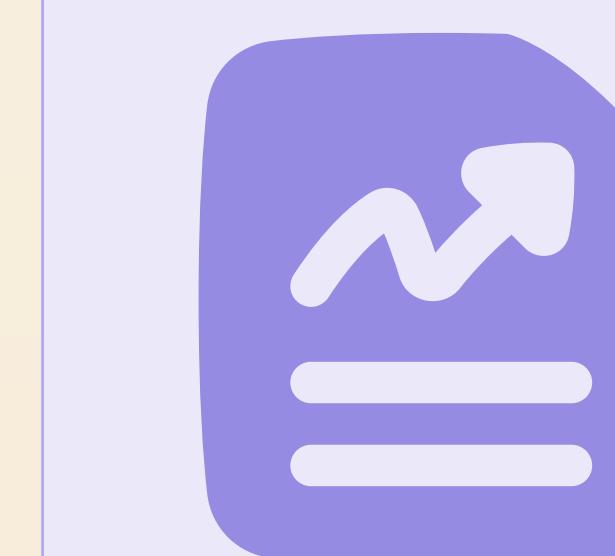

of local authorities<sup>4</sup> provide funding for community climate action<sup>5</sup>

## 10 councils

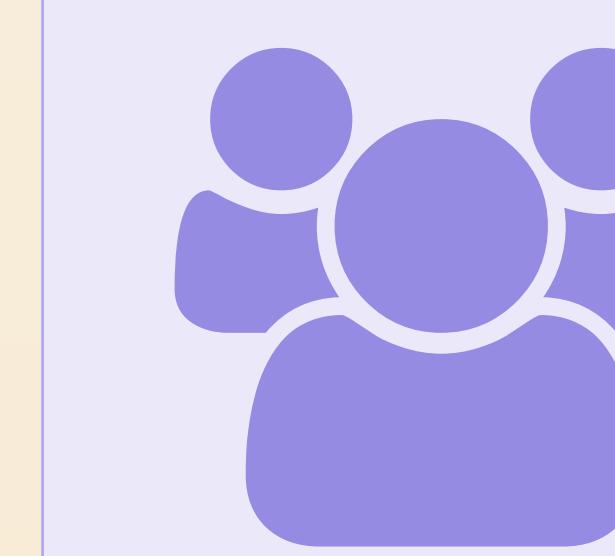

have passed a motion to ban high carbon advertising and sponsorship<sup>6</sup>

### ROOM FOR IMPROVEMENT

**70%** ▲ 7 versus 2023

published an annual Climate Action Update report<sup>9</sup>

**50%** ▽ 3 versus 2023

have an ongoing way for residents to influence the implementation of the council's Climate Action Plan<sup>10</sup>

### MAYORAL AUTHORITIES

## 8 out of 9

have three or more active schemes providing support or tailored advice to businesses in the local area to help them decarbonise<sup>7</sup>

## 5 out of 9

have published a study of different decarbonisation pathways and scenarios to reach net zero<sup>8</sup>

## 35%

of local authorities have lobbied the UK government or devolved administrations for further climate action<sup>11</sup>  
Down from 43% in 2023
